

Stock assessment of sockeye and coho salmon from Billy's Hole, Prince William Sound, Alaska, 2003

Abstract: A weir was operated at Billy's Hole, part of Long Bay in Prince William Sound, Alaska, from June 14 – September 13, 2003. A total of 1,164 sockeye salmon *Oncorhynchus nerka* and 118 coho salmon *O. kisutch* were counted. Ninety-eight percent of the sockeye salmon in the escapement were age 1.3. Fifty percent of the coho salmon were age 1.1 and the other fifty percent were 2.1. No subsistence users and 12 recreational anglers were interviewed. Ten salmon were sampled from the recreational harvest. All were sockeye aged 1.3.
